PROFILE

I am Abhinay Karthik, a focused and determined second-year B.Tech student studying at Neil Gogte Institute of Technology. My academic voyage continues to be propelled by an unquenchable thirst for knowledge in technology and a passion for web development and problem solving.

PROJECTS

Inventory Management Systems   2024

- This project is a Real-Time Inventory Management System designed to track and update inventory levels for businesses in real time. It includes role-based access for Admins and Employees, providing features like inventory tracking, stock movement analysis, and low-stock alerts.

- Technology Stack:
  Frontend: React.js + Tailwind CSS Backend: Node.js + Express.js
  Database: MongoDB Authentication: JWT (JSON Web Tokens)

- Github :- https://github.com/Abhinay2206/ims

Event Master   2024

- I developed a robust and feature-rich Event Management Platform to streamline event creation, management, and attendee engagement. This platform empowers both organizers and attendees with a seamless, user-friendly interface while offering deep analytics and secure payment processing.

- Technology Stack:
  Frontend: React.js + Tailwind CSS Backend: Node.js + Express.js
  Database: MongoDB Authentication: JWT (JSON Web Tokens)
